

LACTOFOAL

Mare's milk substitute

Complete nutritional milk formula for foals

LACTOFOAL can be used as a replacement or supplement for mare's milk. The formula provides all the characteristics of mare's milk and is specially adapted to the specific needs of foals:

- Protein and fat levels adapted to the needs of foals.
- Optimum protein quality.
- Provides prebiotics and probiotics to aid digestion.

The box includes a nipple specially designed for foals and easy to attach onto the bottle.

Uses :

- Rearing and progressive weaning of orphaned foals.
- Nursing supplement for inadequate lactation in mares.
- Post-weaning nutrition.

Composition:

Lactoserum, concentrated milk proteins, fattening milk, Mineral calcium phosphate, fructo-oligosaccharides.

Composition for 1 kg

Crude protein	21 %	Vitamin A	50 000 UI	Vitamin C	250 mg	Iron	100 mg
Crude fat	15 %	Vitamin D3	10 000 UI	Folic acid	10 mg	Zinc	150 mg
Calcium	0,9 %	Vitamin E	120 mg	Biotin	0,5 mg	Copper	10 mg
Phosphorus	0,7 %	Vitamin B1	10 mg	Choline Chl	300 mg	Manganese	90 mg
Yea sacc®	2 000 mg	Vitamin K3	3 mg	Arginine	12 000 mg	Selenium	0,3 mg

Instructions for use:

- *Complete nutrition with LACTOFOAL:*

Dilute 100 g of the product (2 measuring scoops) in 1 litre of lukewarm water. Shake well until a fluid mixture is obtained. Serve the milk to the foal at a temperature of approximately 35°C. Milk substitute prepared in advance can be conserved for 24 hours in the refrigerator. The quantities to serve can be adapted according to the foal's breed and health condition. Gradually adapt quantities and frequency based on the indications provided in the table below. Ask your veterinarian for advice.

	No. of litres of milk / day	Number of times per day
Day 1	8	1 litre every 3 hours
Day 10	12	2 litres every 4 hours or 25 % of foal's weight in reconstituted milk per day
1 month	15	3 litres every 5 hours

Between the 3rd and 4th month, commence weaning the foal by transitioning gradually to dry feed.

- *Nutritional supplement for foals during the post-weaning period:*

Add 500 grams of LACTOFOAL to the feed and gradually decrease the quantity every day.
